
Docker : Docker MasterClass for DevOps

Networks in Docker Swarm

Docker : Service Containers

- Create an Overlay Network.

```
docker network create -d overlay <network_name>
```

- Create Service on user Define Overlay Network

```
docker service create --name <Service_name> --network  
<network_name> -e POSTGRES_PASSWORD=mypassword  
<Image_name>
```

- Create web-service to access the DB and same network

```
docker service create --name <service_name> --network  
<network_name> -p 80:80 <image_name>
```

Thank You...

Don't be the Same! Be Better!!!
