
Docker : Docker MasterClass for DevOps

Create Custom Docker Image

Docker : Service Containers

- Docker Image is Build from DockerFile.
- Docker Build Syntax :
docker build -t ImageName:TagName dir
- **-t** – is to mention a tag to the image.
- **ImageName** – This is the name you want to give to your image.
- **TagName** – This is the tag you want to give to your image.
- **Dir** – The directory where the Docker File is present.

Docker : Service Containers

- Create Custom Nginx Image and Execute it.
- Tools we will use to Edit Docker File: **Visual Studio**
- Download Link of Visual Studio. <https://visualstudio.microsoft.com/downloads/>
- Create DockerFile.

Thank You...

Don't be the Same! Be Better!!!
