Docker : Docker MasterClass for DevOps

Create Service on Docker Swarm

Docker : Service Containers

➢ Docker Service Commands

➢ Create Docker Service
   docker service create

➢ List all running services in Docker Host docker
   service ls

➢ Start some Services on Docker Swarm Host

Docker : Service Containers

➢ Identify running Container for the Service
docker service ps

➢ Scale Up the services
docker service update <service_name> - -replicas <Number of Services>

➢ Verify Auto Scale with Swarm

Thank You...

Don't be the Same! Be Better!!!
