Docker : Docker MasterClass for DevOps

Visualizing Cluster State using Docker Swarm Visualizer

Docker : Service Containers

➢ Executing a visualizer on Docker Swarm involves using a tool that can provide a graphical representation of your Docker Swarm cluster.

➢ Popular tool for this purpose is "**dockersamples/visualizer**"

➢ Write a Compose file.

➢ Execute Compose file as Stack on Docker Swarm.
   docker stack deploy -c docker-compose.yml visualizer

Thank You...

Don't be the Same! Be Better!!!
